Objective

Front-End Developer with hands-on expertise in React.js and Next.js, specializing in building responsive, high-performance, and SEO-optimized web applications. Proficient in JavaScript, TypeScript, SSR, SSG, and RESTful API integration, with a strong focus on clean, scalable, and maintainable code. Skilled in HTML5, CSS3, and TailwindCSS, with a keen eye for design and cross-browser compatibility. A collaborative team player who thrives in fast-paced environments, continuously adopting the latest front-end trends and best practices to deliver user-friendly and impactful digital experiences.

Education

SZABIST University   *Feb 2021 – Feb 2025*
BS in Computer Science
- GPA: 3.42/4.0
- Coursework: Software Engineering, Database Systems, Data Structures & Algorithms, Computer Networks

Experience

Full Stack Developer Intern   *Islamabad, Pakistan*
ITFiers   *June 2025 – Present*
- Developed and maintained responsive web applications using React.js and Next.js.
- Implemented SSR and SSG for SEO and performance optimization.
- Translated UI/UX wireframes into clean, reusable, and efficient front-end code.
- Integrated RESTful APIs and collaborated with back-end developers.
- Optimized applications for speed, scalability, and cross-browser compatibility.
- Participated in code reviews, testing, and debugging.
- Used Git for version control and Postman for API testing.

Full Stack Developer Intern   *Islamabad, Pakistan*
Ignite - NTF   *July 2024 – Dec 2024*
- Administered network infrastructure and provided system-level troubleshooting.
- Managed file servers, network printers, and security policies.
- Collaborated with IT teams to ensure smooth operations of domain services.

Projects

Fake Reviews Monitoring System   *github.com/Fake-Reviews*
- Built a system to analyze Amazon customer reviews.
- Applied NLP techniques to process and interpret review data.
- Detected sentiment patterns to identify biased reviews.
- Classified reviews as genuine or fake to improve trust.

MERN Authentication System   *github.com/mern-auth*
- Developed a full-stack authentication system using the MERN stack.
- Implemented user registration, login, and email OTP verification.
- Integrated Nodemailer with SMTP-Google for secure email delivery.
- Managed frontend-backend communication with Axios.
- Ensured secure authentication with OTP validation and session handling.

Personal Portfolio Website   *faizhassan.app*
- Designed and developed a responsive personal portfolio website using React.js and TailwindCSS.
- Showcased projects and skills with a clean, modern UI and reusable components.
- Implemented smooth navigation and interactive elements for improved user experience.

Technologies

Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Next.js, Redux (Basic)
Backend: Node.js, Express.js, Python (Flask), RESTful APIs, AppScript
Databases/Tools: MongoDB, MySQL, Git, GitHub, Postman, Docker (Basic)
Soft Skills: Problem-solving, Communication, Teamwork, Time management, Adaptability
